

Church Mutual policyholders go to great lengths to establish a safe environment for those who gather at their facilities. This often means preparing for an emergency like sudden cardiac arrest (SCA). The only treatment for SCA is defibrillation. An automated external defibrillator (AED) is a public access device designed to treat SCA.

True to Church Mutual's mission to protect the greater good, we have partnered with AED Superstore to offer discounted rates on AEDs, safety supplies, training, and compliance assistance.

Contact AED Superstore for life-saving equipment

# AEDSuperstore®

# RISK CONTROL SERVICES

## A value-added element of your policy

As a Church Mutual policyholder, you have access to our risk control consultants, services and tools, including safety literature, videos and web seminars – invaluable resources at no extra charge to you. Partnering with our policyholders to nurture safer environments is one way Church Mutual maintains long-term relationships with organizations like yours.

## We can help you protect your organization

Here are just a few of the areas where our risk experts can help you:

- On-Site Consultation
- Safety Committee Consultation
- Replacement Cost Valuations
- Risk Control Presentations
- Ergonomic Evaluations
- Loss-History Analysis
- Phone/Email Consulting
- Policy/Procedure Review

## We also can help you identify specific hazards

Our risk control experts will evaluate every aspect of your facility to identify potential threats to personal safety and property, including threats you may never considered, including:

- Property Protection
- Child Safety
- Fire Prevention
- Emergency Preparedness
- Responsible Auto Use
- Building Valuation
- Safety Culture in the Workplace
- Activity Planning

## Risk Control Central
